Skills

- **Programming Languages**: Python, Java, C++
- **Software Development**: Agile, Git, CI/CD
- **Deep Learning**: TensorFlow, PyTorch
- **Machine Learning**: Scikit-learn, supervised/unsupervised learning
- **Data Structures & Algorithms**: Optimization, scalability
- **Database Management**: SQL, MongoDB
- **Debugging & Testing**: Unit testing, integration testing

Detail-oriented, organized, and meticulous employee with a proven track record of meeting tight deadlines. Thrives in fast-paced environments and consistently delivers high-quality work. Dedicated team player enthusiastic about contributing to the company's success.

Work History

2024-09 - Current

Software Engineer

Lockheed Martin, Camden, NJ

- Developed scalable and maintainable code, ensuring long-term stability and adaptability of software systems.
- Created reusable components that streamlined development workflows, reducing effort across multiple projects.
- Implemented robust debugging strategies, minimizing defects and enhancing system reliability and user experience.

2023-09 - 2024-03

Software Engineer

SRI International, Princeton, NJ

- Developed a script to parse and analyze a 20M-line codebase, expediting system understanding and emulation.
- Collaborated to establish a foundation for product development, streamlining workflows and solving challenges.
- Adapted to diverse environments, including Linux, VMs, and Windows, demonstrating technical versatility.

2022-09 - 2023-04

Brain Computer Interface Software Developer

Temple University School of Medicine, Philadelphia, PA

- Developed a brain-computer interface (BCI) using EEG tools, demonstrating technical innovation.
- Documented processes to support future development and knowledge transfer.
- Conducted user tests, achieving over 80% success rates and validating system effectiveness.

Education

2021-09 - Current

Bachelor of Science: Computer Science

Drexel University - Philadelphia, PA
Anticipated Graduation: June 2026

Coursework

- **Core Computer Science**: Data Structures & Algorithms, Computer Programming I & II, Advanced Programming Tools, Computing & Informatics Design I–III
- **Mathematics**: Discrete Math, Linear Algebra, Calculus I–III
- **Science**: Physics I–III

Certifications

2024-12	Neural Networks and Deep Learning
2024-12	Fundamentals of Reinforcement Learning
2024-12	Structuring Machine Learning Projects
